7:30 a.m. - 3:30 p.m. both days

Registration: \$70 fee for non-ISEC educators
(Registration will begin in July)

Keynote Speakers: Dr. Harry K. Wong and Dr. Rosemary Wong

In 2006, *Instructor* magazine polled its readership of teachers and asked them to name their most admired people in education. The final list of 20 included Laura Bush, Hillary Clinton, Howard Gardner, Maya Angelou, Oprah Winfrey, and Harry Wong.

Harry Wong, Ed.D., and Rosemary Wong, Ed.D., are the most sought-after speakers in education, typically booked several years into the future. The husband and wife team are authors of the best-selling book, *The First Days of School*, which has sold more than 3.6 million copies. Harry is a former award-winning high school science teacher and has received the Horace Mann Outstanding Educator Award and National Teacher Hall-of-Fame Lifetime Achievement Recognition, while Rosemary, a former elementary teacher, has received the Silicon Valley Woman of Achievement Award and Southern Louisiana University School of Education's Distinguished Alumnus Award. They both received the Upton Sinclair Award and were nominated for the Brock International Prize in Education.

Afternoon Speaker: Dr. Jeff Goldstein

Dr. Goldstein is Director of the National Center for Earth and Space Science Education, responsible for overseeing the creation and delivery of national science education initiatives with focus on Earth and Space. These include programs for schools, families, and the public; professional development for grades K-12 educators; and exhibitions for museums and science centers. Dr. Goldstein oversees the Voyage National Program, which installs replicas of the Voyage Model Solar System in communities around the world.
