LANL Foundation and Santa Fe Community College have partnered to present an exceptional learning experience for anyone who works to support families and wishes to see all children grow and thrive to achieve their full potential in life.

KEYNOTE
This two-day event features Dr. Bruce Perry, leading child psychiatrist, author and consultant whose expertise on the long-term effects of trauma in childhood has often put him in the spotlight during national tragic incidents.

WHO WILL ATTEND
All are welcome. Early childhood educators, social workers, medical professionals, policy makers and law enforcement personnel will especially benefit from the Symposium. The Symposium is open to a national audience.

The Summit is designed for New Mexico’s home visitation professionals.

WHY SPONSOR
• Your organization will appear alongside the LANL Foundation and SFCC: two prominent, trusted organizations collaborating to advance knowledge, skills and practices across the field of early childhood health and development. Your sponsorship puts you at the center of attention as we work together to improve early childhood outcomes in New Mexico.
• The added benefit of a display booth can engage the attendees in your business or service.
• Sponsor seating is available (see package levels).
Thank you for considering a tax-deductible sponsorship to support this important learning opportunity!

YES, I/WE WOULD LIKE TO SPONSOR THE 2019 EARLY CHILDHOOD SYMPOSIUM AND HOME VISITING SUMMIT!

SPONSORSHIP LEVEL (please check one)

❑ EARLY CHILDHOOD CHAMPION • $10,000
  Fact: When children have the benefit of a high-quality early childhood education, they make cognitive and social gains that last throughout school and into adulthood. A child without an early childhood education is 25 percent more likely to drop out of school, 40 percent more likely to become a teenage parent, and 70 percent more likely to be arrested for a violent crime.

❑ PRESCHOOL • $5,000
  Fact: Preschool is a time to focus on social-emotional skills. Brain connections continue to be stimulated through experiences. Relational skills, communication, and expressing feelings are learned, and empathy is developed through group experiences.

❑ TODDLER • $2,500
  Fact: Mental and social development is happening rapidly in toddlerhood. At age two, toddlers have more than 100 trillion neurological cell connections (synapses), which are the most they’ll have in their life.

❑ INFANT • $1,000
  Fact: Infants spend their first year learning to feel secure and loved. This security sets the stage for physical strength to fight illness, emotional grounding and the ability to learn.

❑ PRENATAL • $500
  Fact: A significant amount of brain development happens during pregnancy. This early brain development lays the foundation of a baby's intelligence for the rest of their life.
